Introduction

Undergraduate Software Engineer with over 1 year of professional experience in the software industry. Experienced in collaborating with cross-functional teams, developing and publishing mobile applications and web applications, leveraging AI tools to enhance workflows, writing clean and maintainable code, and communicating effectively across technical and non-technical stakeholders.

EXPERIENCE

ByteCorp Technologies

Nov. 2025 – Present

Associate Software Engineer

Karachi, Pakistan

- Enhanced and optimized the company website (**bytecorp.io**) by improving UI components, responsiveness, and overall performance
- Developed and launched a cross-platform mobile application for client **NXTSTIM** using **React Native**, published on both **App Store** and **Google Play Store**
- Implemented core features including user authentication, API integration, and dynamic UI rendering to ensure seamless user experience
- Collaborated with cross-functional teams (**QA, Business Analysts, Developers**) in an **Agile environment**, contributing to sprint planning and timely feature delivery

Lambda Theta

Mar. 2025 – Nov. 2025

Software Engineer Intern

Karachi, Pakistan

- Contributed to the development of **Eaxee**, an Enterprise Architecture tool, by building the **Organization Portal**, improving workflow efficiency by **25%**
- Integrated **React frontend** with **RESTful APIs**, reducing data load time by **30%** and enabling faster feature delivery cycles
- Developed **10+ interactive dashboards** using **Apache ECharts**, enhancing data visualization and improving user decision-making speed by **35%**

PROJECTS

KitabiBuddy (Pitch Link)

- Developed a scalable solution to manage **1000+ books**, addressing real-world data organization challenges
- Selected for **NIC Cohort 14 Pitch**, successfully presenting the product among competitive startup ideas

PureMeds

- Built a full-stack **eCommerce platform** to combat counterfeit medicines in Pakistan, integrating **blockchain** for secure and transparent on-chain data storage
- Developed a comprehensive **admin dashboard** to manage inventory, users, and transactions, ensuring efficient system operations and data integrity

NoorShare

- Developed a mobile app to read, listen, and explore the Quran by **ayah, surah, and parah**, providing an interactive user experience
- Enabled users to create posts and seamlessly share Islamic content across multiple **social media platforms**

StudyOS (Website)

- Developing a student productivity tool to manage semesters, track study progress, and organize notes efficiently
- Features interactive dashboards for visualizing study metrics, a note-taking system, AI-powered quiz generation, and supports both light and dark modes; future enhancements will leverage AI to provide personalized study recommendations

EDUCATION

NED University Of Engineering And Technology

Nov. 2023 – Aug. 2027

Bachelor of Engineering in Software Engineering

Undergraduate

- **Coursework:** Data Structures, Operating Systems, OOPS, Database Management Systems, Software Quality Engineering, Software Design and Architecture

ACHIEVEMENTS

Winner of **SMEC 2025 Hackathon**, demonstrating problem-solving and rapid prototyping skills

Selected for **NIC Cohort 14 Onsite Pitch**, presenting innovative ideas among top startups in Pakistan

SKILLS

Languages & Frameworks : JavaScript, Python, React.js, Next.js, Express, Nest.js (basics), React Native Expo, SQL, NoSQL, MySQL, PostgreSQL

Tools : Figma, Notion, VS Code, Git, GitHub, Azure DevOps, Docker, ShadCn, Canva, Cursor, Copilot
